Student Drop-off

To: Parents/Guardians  
Re: Drop-Off Procedure in the Mornings

Dear Parent/Guardian:

Several students and student leadership teams have requested I communicate with you regarding the morning drop-off procedure. In an effort to expedite the flow of traffic that builds in the parking lot and slows traffic in the public streets, these students have requested that you drop off students along the entire sidewalk lining the student parking lot. They believe this will significantly decrease the amount of time it takes to drop students off in the morning and, consequently, decrease the amount of traffic that is backing up in the public streets.

Thank you very much for your consideration,

Atherton High School Administration
Student Pick-up

August 21, 2012

To: Drivers picking students up after school
From: Atherton HS Administration
Re: Afternoon pick-up procedure

- Upon entering lot, turn left and park along the street and the first full row of parking spaces (see diagram). The entire drive along the sidewalk will no longer be open to traffic 1:30-2:30.
- Please do NOT drive further into the lot, park in student spaces, or park in drive areas.
- Do not park in the handicap parking spaces unless your CHILD is handicapped.

These procedures were put in place at the request of students on the principal’s forum to make the flow of traffic more efficient and to create a safe environment for students after school. Thank you very much for you understanding and helping us to maintain a safe environment and an efficient system for students and drivers.
