

## SBH Clinic Social Distancing Protocol for Sports Physicals and Immunizations

- Telehealth visits will continue when applicable for certain visits
- Sports Physical and Immunizations will require on site visit with provider
- Park Duvalle staff will wear proper PPE at all times, including masks, gloves, having soap water/disinfectant available for each patient contact. Hand sanitizer will be readily available at all stations for patient use.
- Registration station will be held outside the clinic in designated hallway. Station will have plexiglass divider between student and registration personal. Staff will provide student a mask to wear at all times while in clinic areas. Covid Questionnaire will be asked at that time. Temperature of student will be taken.
- Student will proceed to the nurses area also designated outside the clinic on opposite side of hallway for pre-assessment prior to being seen by the provider.
- Each station to be separated by minimum of 10 ft. Marking on floors will be visible.
- Student will be seen by the provider in the exam room.
- Once the student is finished with the visit. Student will exit through a designated exit only egress. Hand sanitizer at exit. Door knobs cleaned after student exits.
- Both Centers (PRP and Central) have a set up for this scenario.
- Visits will be spaced out and a text communication will be sent to patient when they are allowed to come up for their appointment.
- Park Duvalle has enough supplies to run FDA EAU SARS COV2 virus testing (PCR and Antibody) available to all students and staff.
